DOCK LIGHTING

Quality materials and insightful design make the LDPI, Inc. dock light the toughest available.

INCANDESCENT DOCK LIGHT HEAD

Light heads include a recessed 3-prong IEC type plug which will plug directly into the receptacle of any single strut modular arm. One light head and one single strut arm make a complete modular dock light. 42" modular arm available. Uses PAR or BR lamp - not included.

- Lowest initial cost
- Instant on
- Excellent color rendering
- Up to 4,200 hours of lamp life
- Output: Up to 3,700 lumens
- Available up to 300 Watts
- Wire guard included (not shown)
- Not available in 277 volt.

Lamp not included

METAL HALIDE DOCK LIGHT HEAD

Light heads include a recessed 3-prong IEC type plug which will plug directly into the receptacle of any single strut modular arm. One light head and one single strut arm make a complete modular dock light. 42" modular arm available. Uses ED17 Med. lamp - included.

- Lowest initial cost
- Excellent color rendering
- Requires brief startup
- Up to 15,000 hours of lamp life
- Output: Up to 6,000 initial lumens
- Available in 70 Watts
- Not available in 277 volt.

Lamp & glare guard included

42" SINGLE STRUT DOCK LIGHT ARM

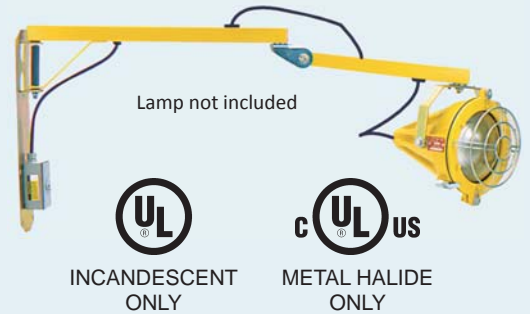

42" Single Strut Dock Light Arms are made from 1 1/2" square steel tubes and have a 3/16" thick 3x5" zinc plated steel mounting bracket. The arm features a wear-resistant 3-conductor AC cord with standard 3-prong plug which fits directly into standard outlets. A wrist-action joint permits multi-directional movement. An on/off rocker switch controls power to the light head. The arm also has washers at all joints and bushings at bracket joints for smooth operation, greater stability, and long wear.

WET LOCATION COMPLETE DOCK LIGHT

Wet location models are ideal for use outdoors or in wet indoor environments. Available with incandescent or metal halide heads with a 42" arm.

- Silicone gasket seals out dirt and moisture
- Tempered glass lens and wire lens guard are standard
- Rugged cast aluminum is copper free for greater corrosion resistance
- Weather-tight fitting seals out moisture around the cord
- Prewired weather proof switch
- Zinc plated steel hardware resists corrosion

Lamp not included

INCANDESCENT ONLY

METAL HALIDE ONLY

EXPLOSION PROOF COMPLETE DOCK LIGHT

Available with incandescent or metal halide heads with a 26" arm. Lamp not included.

Explosion proof models are ideal for task lighting in hazardous environments, including Class I, Div. 1 areas.

Incandescent: Class I, Groups C and D; Class II, Group F, Class III
(Fixtures 100 watts or more are not UL listed for Class III)

(Fixtures over 110 Watts are not UL listed for Class II, Div. 1, Group F, or Class III)

Metal Halide: Class I, Groups C and D; Class II, Groups F and G, Class III.

- Shell and cover are corrosion resistant cast, marine grade low copper content aluminum with a thermoset powder-coated safety yellow finish.
- 3/4" thick tempered glass lens resists thermal shock and impact damage
- Wire entrance is factory sealed
- Threaded joints between shell and cover permit internal pressure to be dissipated and provide a cooling path for escaping gases

Lamp not included
