## NEW LE121 Fixture

**Eau Claire, WI – August 31, 2015** - LDPI, Inc., a leading manufacturer of LED hazardous location light fixtures, announces the immediate availability of our new **LE121** Fixture. This general industrial fixture is available in 4ft, 6ft or 8ft lengths and can be manufactured with 2, 3 or 4 rows of LEDs. Twenty Seven different lumen packages are available ranging from 13,710 to 74,800 lumens per fixture. Energy efficient LED arrays can deliver energy savings of up to 40% as compared to fluorescent technology.

Delivering up to 74,800 lumens, this fixture packs a punch and is perfect for high bay industrial lighting, warehouse, task and assembly areas.

UL listed to US and Canadian standards, this fixture can operate effectively in ambient temperatures up to 50°C. Optional emergency driver backup, DALI controllable, Occupancy Sensor, color options, wire guards and cord options give you the flexibility needed for all types of projects.

The **LE121** is ready to illuminate general industrial, warehouse, task and assembly areas. It's highly customizable to provide the desired lumen output, color temperature and directional light to suit any general application.

The **LE121** is just one part of a complete range of general purpose, hazardous location and explosion proof fixtures and control solutions offered by the experts at LDPI.
